

PRESS STATEMENT FOR IMMEDIATE RELEASE

Vertual Ltd, Hull, UK, announces a collaboration agreement with Orfit Industries, Wijnegem, Belgium, to increase the range of immobilisation equipment in the VERT portfolio by incorporating state of the art immobilisation equipment developed by Orfit Industries.

March 8th 2021

Vertual is pleased to announce that a collaboration agreement has been signed with Orfit Industries NV to model Orfit immobilisation equipment within the VERT software. The additional immobilisation equipment for VERT will improve our products' realism for our customers. A customer survey was conducted to prioritise the development based on their needs and priorities. The Orfit MammoRx breast board model is complete and will be available in the forthcoming VERT 5 software release for those customers with a valid software support contract. Further Orfit immobilisation equipment models will be included in future VERT releases.

Orfit Industries will benefit from brand awareness, publicity within the VERT software for radiation therapy schools and clinics worldwide and increased awareness amongst the radiation therapy community of the range of immobilisation products available from Orfit.

Debra Leeves, CEO Vertual Ltd. says "We are delighted to collaborate with Orfit Industries on this new venture, which will add functionality to VERT products and enable students around the world to practice using realistic immobilisation set ups. We look forward to working with Orfit Industries on this and potential future collaborations".

Emilie Cuypers, Product Manager Radiation Oncology, Orfit Industries, quoted, "We are happy to collaborate with Vertual to allow VERT Users to practice with realistic immobilisation set-ups. Orfit immobilisation devices are used in radiation therapy centres across the world and are tailored to the needs of the patient and radiation therapists".

About Vertual Ltd

Vertual Ltd. is the leading provider of virtual reality training systems in radiation therapy and is based in Hull, UK. VERT, the flagship product, is installed at over 150 centres in 34 countries. The Orfit collaboration is part of a strategy to increase vendor partnerships and build a pipeline of new products through in-house development and collaborations that fulfil market needs.
